Summary

A WordPress developer is a professional who specializes in creating and customizing WordPress websites. They have knowledge of HTML, CSS, PHP, and JavaScript, and use these skills to create and modify the appearance and functionality of a WordPress website. A WordPress developer may be responsible for tasks such as creating custom themes and plugins, integrating with other systems, and optimizing website performance. They may work as a freelancer, for an agency, or in-house for a company.

Experience

Web Developer

Toptal

Jan 2023 - Present (6 months)

Currently, I am working as a Software Engineer at Toptal, a renowned global talent network. At Toptal, I have had the privilege of working with exceptional teams and clients on challenging projects, honing my technical expertise and problem-solving skills. Collaborating remotely with diverse and talented professionals has further strengthened my ability to adapt to different working environments and effectively communicate complex ideas.
